

PROGRAM

Live Conference – June 12 & 13, 2023 (CEST)

SUSTAINABLE FINANCE ON A GLOBAL SCALE DIGITALIZATION AND SUSTAINABLE TRANSFORMATION – A NEW FINANCIAL MODEL

GLOBAL CONFERENCE
JUNE 12 & 13, 2023 (CEST)

Background Information

Bridging global sustainability ambition to action – the time is now!

The World has undergone massive changes in the global landscape, in every industry. Financial markets have been primarily affected by the launch of the taxonomy, threatened by the accelerating climate, and put under pressure due to geopolitical uncertainty. With war in Europe, global unrest and political landscapes undergoing massive changes, it is now time to channel powers towards elevating sustainability efforts, for future generations to come. The financial sector plays one of the most important roles since it acts as global enabler for the transformation of the industry. Inflation, the ECB-interest adjustments, a need for specialists in the field of sustainable finance and the development of reporting standards are only a few of many examples which will shape our financial industry in the coming years and will be the key influencer for the financing of sustainable transformation efforts.

The Sustainable Finance Conference takes place in the context of the Digisustain, the global meeting hub for Digitalization and Sustainability at Kap Europa, Frankfurt/Main.

Initiated by

In cooperation with
